Epic Zones That Make All The Diference!

Sensory-Gross Motor Zones

are specialized areas designed to support and enhance the development of children’s sensory and gross motor skills.

These zones often include equipment such as:

- Sensory Table
- Rock Climbing Wall
- Play Structure
- Slide & Swing
- Climbing Bars

that encourage children to engage in physical activities that enhance not only their senses but also their gross motor skills—skills that involve the large muscles of the body required for movements like walking, jumping & climbing.

Sensory elements such as:

- Texture Surface
- Colors
- Lighting
- Sound making objects

can also be incorporated to stimulate children’s senses, helping them process sensory information more effectively.

Holistic Integration

Holistic development emphasizes addressing all aspects of a child’s growth—physical, emotional, social, and cognitive. These zones promote active play and interaction among children, allowing them to develop social skills and learn to work together, which is a crucial aspect of holistic development.

PLANTS

contribute to a child’s holistic development by enhancing sensory experiences, promoting physical activity, fostering responsibility through caretaking, encouraging curiosity and learning about nature, and providing emotional well-being through exposure to green spaces.

WALL MURAL

can play a significant role in the holistic development of a child by engaging multiple aspects of their growth and learning. Here are some ways they contribute:

- ↳ Enhance visual stimulation, creativity, and imagination
- ↳ Create engaging environments for learning and curiosity
- ↳ Incorporate educational themes, vibrant colors, and familiar characters
- ↳ Aid cognitive and emotional growth
- ↳ Inspire storytelling, language development, and social interaction

PRETEND PLAY

also known as imaginative play or make-believe play, is a crucial foundational activity that supports holistic development, providing children with a safe space to explore ideas, emotions, and social interactions.

Some of the benefit may includes:

- ↘ Cognitive Development
- ↘ Language Skills
- ↘ Social and Emotional Skills
- ↘ Creative Thinking
- ↘ Physical Development
- ↘ Self-regulation and Executive Functioning
